2.1 R1

1/1 point (graded)

In the expression $\text{Sales} \approx f(\text{TV}, \text{Radio}, \text{Newspaper})$, "**Sales**" is the:

☒ Response ✓

☐ Training Data

☐ Independent Variable

☐ Feature

Explanation

The variable which you are trying to model is called the response or outcome. The other variables are called features, predictors, or independent variables. Together, the collection of features and response values that you will use for fitting form your training data.
